Abstract

The abstract is a brief (50-80 words) synopsis of your 2-page paper. Its use is to provide a quick outline of your presentation, giving the reader an overview of the research. This is an important aspect of your paper, as it is this description that may attract the reader to continue and finish your full report.

1. Introduction

This sample shows basic guidelines for preparing camera-ready paper for the conference.

Authors of ADMETA^{Plus} 2013 are requested to submit an abstract in the PDF format, which will be compiled and distributed to conference attendees. Please read this instruction carefully and prepare your abstract. Please note that only **electrical submission in the PDF format** is accepted.

2. Manuscript preparation

Manuscripts should be written on vertical A4 size (210 × 297 mm) paper. The text should be typed in double column format with 10 to 11pt font size. Times New Roman or similar fonts are recommended. Please set margins: head 25 mm, foot 25mm, left/right 20mm.

The text containing of abstract, introduction, experimental, results and discussion, conclusion, acknowledgements and references should be written on the first page. All figures, tables and photos must be arranged within the last page.

Please do not page number your paper.

3. Illustrations

All figures and tables must be given sequential numbers (1, 2, 3, etc.). Figure captions should be below the figures; table captions should be above the tables.

4. Manuscript submission

Send your abstract to the Program Committee of ADMETA^{Plus} 2013 via ADMETA^{Plus} 2013 Submission web page in the PDF format.

Acknowledgement

We would like to express sincere thanks to all the contributors of the conference for their cooperation in the conference program.
